The Ir	nstitute in Kharkov, located in the west astitute sustained of cated the Kharkov E chanichiski Institut call University City ik building called the were attending the	USSR (Mechaniki- center of town, nly minor damage during lectro-Mechanical) of about the same . On Pushkinskaya ne "Gigant" (Giant). various colleges

- 3. In 1939, the Mechanical-Machine Building Institute had approximately 40 professors, plus numerous visiting professors. There were about 1500 students, with approximately 300 graduating yearly. The Institute turned out mechanical engineers specializing in such fields as turbines, automobile repair plants, factory construction, and repair of diesels. I can remember only the following professors by name:
 - a. Tosip Zaharovich Sevastyanov taught cold working of metals, ie, use of metal-cutting lathes. He was good as an engineer and as a teacher. He was about 49 years old in 1939.
 - b. (fnu) Podporin taught general machine construction (turbines, steam engines, etc). He was good in his field. About 58 in 1939.
 - c. (fnu) Proskurov taught mechanical engineering.

two stories in the section which housed the turbine.

d. (fnu) Prokofieff - taught mathematics. About 50 in 1939.
